

GMM CF577BLE

Bluetooth Wifi 8 Electrode Smart Body Fat Scale Body Composition Analyzer

SKU: GMMCF577BLEWIFI

Manufacture Warranty period: 12 months

Country of Origin: China

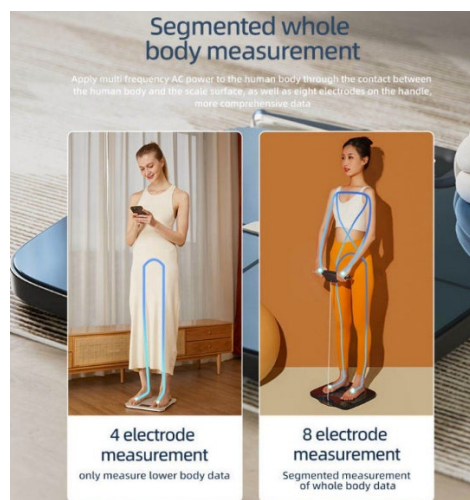

Description

A smart body fat scale with 8 electrodes typically provides more accurate measurements compared to scales with fewer electrodes because it can measure impedance from multiple points on your body. This allows for a more precise calculation of body composition, including muscle mass, body fat percentage, and water weight.

- **Heart Rate & VA Screen**
Track more than just numbers—monitor your heart health alongside body composition. The vibrant VA screen showcases your results clearly, making it simple to follow your progress and stay motivated.
- **Dual Frequency & Segmented Analysis**
Get precision you can trust. Dual-frequency technology ensures accurate readings, while segmented analysis breaks down results by arms, legs, and trunk—helping you understand your body like never before.
- **Medical-Grade Accuracy**
Powered by a medical-grade chip for reliable, professional-level measurements you can count on.
- **TFT Display**
Enjoy a sleek, colourful display that makes every check-in engaging and effortless.

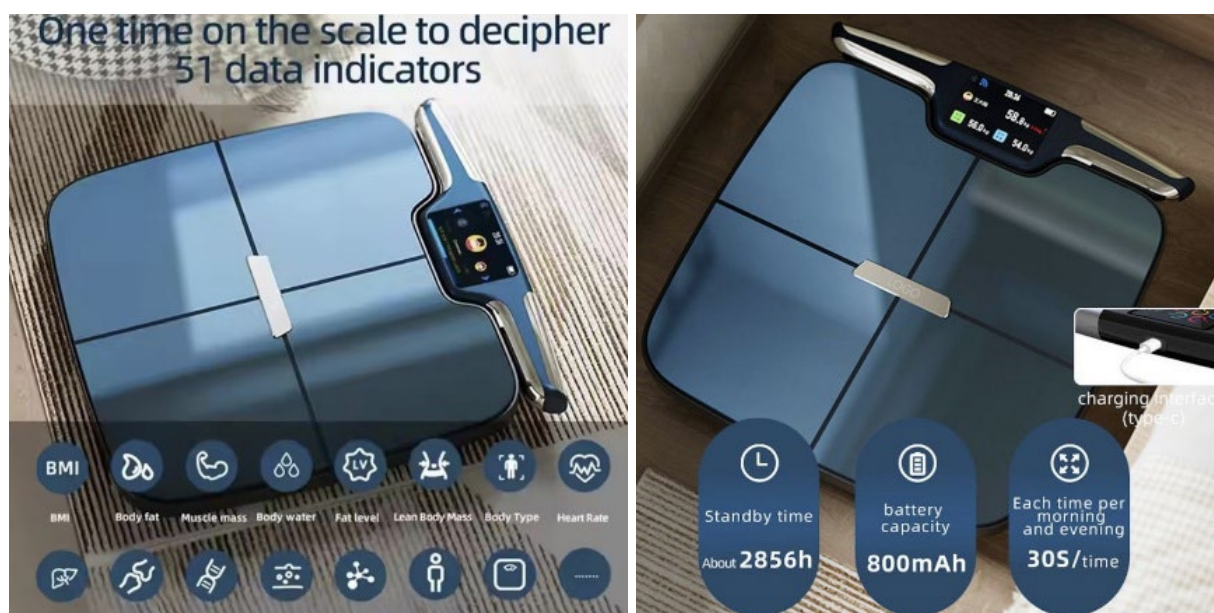

Features:

- Bluetooth Low Energy Module compatible with iOS & Android systems
- 56 Measured Parameters: Body weight / Standard weight/ Body fat / Body water / BMI / BMR / Bone mass / Muscle mass / Visceral fat / Protein / Fat level / Body Type/ Subcutaneous Fat Rate/ Lean Body mass and so on
- **Generate and Print A Body Composition Report**
- No limited users
- Equipped with 8 high precision sensors
- Step power on/auto power-off
- Low battery and overload indication
- TUYA app connected

Specification

Weight capacity:	0 to 180kg / 396lbs
Division:	0.05kg / 0.1lb
Unit:	Kg / lb
Display:	TFT display
Material:	6mm tempered safety glass
Platform size:	300 x 300 x 28mm
Battery:	800MAH Lithium Batteries (Bulit-in)
Charging Port:	Type C

Unique Health

Unique Health analysis

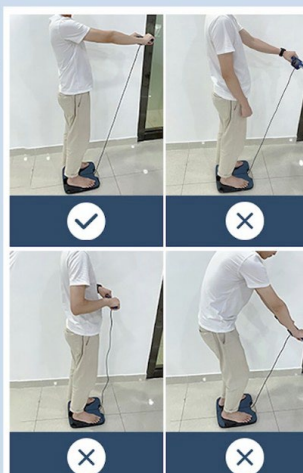

Your health is more than a number

Ours VS Others

Ours	Others
01. Medical grade 8-electrode body fat meter, measuring whole body data	01. Ordinary single current measurement, only able to measure lower body data
02. ITO coating conductive process	02. Only show weight
03. High-energy TFT hidden display	03. Normal LED display
04. CNC round edge chamfer, not easy to cut	04. Ordinary chamfering, easy to have burrs, easy to cut

Correct measuring method

The feet are naturally distributed on both sides of the electrode slice
